

Mikael Daskalou, Softwhere Developer C# .Net

Berättelsegatan 39, Göteborg, 42242, Sverige
0739598665 — mikael.daskalou@hotmail.com

I am seeking an internship placement in .NET development for the period from September 1 to November 7, 2025.

My passion for service, problem-solving, and creativity has shaped my journey over the years. With a strong sense of structure, aesthetics, and functionality, I thrive in dynamic environments where I can combine strategic thinking with a high level of service. I am passionate about clean code and smart architecture, and I have experience in:

- **Backend:** C#, .NET, Entity Framework Core, OOP, design patterns
- **Database Management:** SQL, relational databases, ER diagrams
- **System Design:** UML, object-oriented analysis and design

During the summer, I will further develop my skills in:

- **Web Development:** ASP.NET Core Web API, frontend with React and TypeScript
- **Test-Driven Development:** TDD, integration testing
- **DevOps:** CI/CD with GitHub Actions, Azure deployment
- **API Integrations:** For example, OpenAI
-

I am currently studying system development at NBI/Handelsakademin in Gothenburg and have a strong interest in backend development within the .NET framework. My previous experience as a teacher and entrepreneur has provided me with valuable skills in leadership, clear communication, handling complex situations, and managing projects from idea to completion. These experiences have also strengthened my ability to collaborate, think pedagogically, and structure my work efficiently—skills I now apply in my technical training and development projects.

I am curious, committed, and enjoy working in a solution-oriented way. As an intern, I would like to contribute to your team with drive, responsibility, and a strong willingness to learn.

Thank you for taking the time to read my application—I look forward to the opportunity to discuss further in an interview.

Best regards,

Mikael Daskalou
